

# VIRT 211 : 3D Technical Art

Artists will be introduced to scripting in Python using an integrated development environment focusing on programming tools for an industry-standard animation software package. Students will continue to master creating interactive behavior using graphical nodes. Topics include procedural generation, advanced material creation and particle effects.

**Credits** 3

**Studio Hours** 6

**Lecture Hours** 0

**Prerequisites**

VIRT 100 or GAME 240, MEDA 123C or 123D, or with instructor approval.
